

# ZERO BEAT

## HAMPDEN COUNTY RADIO ASSOCIATION

SPRINGFIELD, MASS

DECEMBER 1984

ARRL AFFILIATED, 36th YEAR

### Hampden County Radio Association

#### Next Meeting

Friday December 7, 1984

Feeding Hills Cong. Church  
Center of Feeding Hills  
Routes 57 and 187

Doors open at 7:30 PM

Meeting starts promptly at 8:00 PM

Please, no smoking during  
the meeting! Thank you!

Some Places We've Been...  
Some Places We're Going...

K1BE and others will present slides from past HCRA glories  
Field Days, Special Events, etc...

Memorabilia including B&W photos, color pictures and  
awards will be on display.

Also...

Home Brew Nite

Bring in those projects you've been building and show  
them off! Rigs, amps, computer interfaces, and what  
have you?

#### IN THIS ISSUE:

- New CQ DX column premiers!  
Send your questions on DX  
into ZERO BEAT. i.e. "How do  
I get a OSL from HUI DX?" "How  
can I work Mongolia?", etc
- Classic Exchange Contest
- VF Program
- W1NPL's Special Greetings

%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%

DUES ARE \$9.00 PER SEASON. (Sept-June) MAIL TO: Greg Stoddard, N1AEH,  
1500 Mapleton Ave, Suffield, CT 06078

#### Volunteer Examiner Program

The club will sponsor its' first all-amateur-administered license  
exam session on Saturday, January 12, 1984 at the Hampden -  
Wilbraham Regional High School, 621 Main Street, Wilbraham, MA.  
Examinations for all clases of ham license will be given, from the  
Novice to the Extra.

Those of you who are out there who are holding a Tech class  
license take note: for \$4.00 and a little practice you can take a  
local exam and upgrade to General, or even higher! The way we  
see it is that you have nothing to loose, and a whole world of  
frequencies to gain. So you have a Novice and you'd like to come  
up to the Tech or higher? Now is the time to prepare! And don't  
stop at the Tech ... you can go all the way for just \$4.00 and a few  
hours in January.....

If you are interested in taking any of the exams, here's what you  
have to do:

1. Get a FCC form 610, from the FCC, ARRL or contact K1BXE (below)
2. Fill in the blanks on the form 610 - select which class to go for (Extra?)!
3. Make a copy of your current license (only if you have one...)
4. Find your checkbook and make out a check for \$4.00 to ARRL/VEC
5. Get all the above mentioned things together and mail to:

Yorke Phillips K1BXE  
235 Ames Road  
Hampden, MA 01036

Please note that you must have your completed application in by  
December 14, 1984. This is the cut-off date for the January 12th  
exams. So don't delay, act today - and upgrade in January with  
the HCRA volunteer exams!

#### IN FUTURE ISSUES:

- W1KK explains the physics of  
left and right hand circular  
polaritv!
- VHF Sweepstakes logs, articles,  
and our new GAME PLAN to win!
- How to work with semiconductors.

CLASSIC RADIO EXCHANGE

You like older radios but you've never heard of the CX Exchange! Shame on you! This is the best (and most likely, only) radio contest where the old, old gear gets to chirp away. Here are some excerpts from the fall Classic Radio Exchange Newsletter: (Editor is a good friend of KlBE's) Hope this spurs you into trying this great contest!

Finally made it on 30M CW. Working on a portable set-up: BC-224, a Globe Scout (yest I still haven't got it working) and an all band single 813 era 1956 Handbook. (I drive a 3/4 ton Travelall -- "portable!!!")

--Mike, W7DRA

Well another CX is over and there certainly was a lack of AM or SSB activity. Perhaps a few should fire up the Globe Kings and Valiants on AM also. I did not get on 2M AM this time as I was busy that night; but in September I should be on 2M AM. The Johnson collection here is slowly getting larger; but good V.I. are very hard to find up here and very expensive. I should have the HF Thunderbolt amplifier on the desk by next September and possibly a Ranger or Navigator as an exciter. --Mike, VE3FGU

It sure was nice hearing the old familiar calls and rigs again. I tried running 40M SSB with my Apache but couldn't make any CX QSOs. It seems there has been a big resurgence of AM activity on the low bands -- even 20M.

-- Dick, K8MIA

I would like to know if you (or anyone) is aware of any group or society operating an Amateur Radio Equipment Museum. If there is any such activity, I would be happy to donate some of my home-built rigs (and possibly some commercial also) if I could be assured they would be properly cared for and displayed. Some of this equipment, in my way of thinking, belong to what I think can be properly described as the last generation of home-built equipment. As you are quite aware, the advent of SSB in the mid-50s caused almost a total swing to commercial built gear. I think it would be highly desirable if some of the old home-built rigs could be preserved so that the hams of the future could see how it was done "in the olden days".

--Bob Mitchell, K5WXR  
1023 So. 22nd St.  
Rogers, AR 72756

Here is a list of stations I worked, but am not very good at adding up the score; but it was a lot of fun. My old equipment includes a RME69 and NC300. My old AM transmitter has been converted to a 4/1000A linear which I never use any more. So my present rig is a 14 year old Galax GT550A.

--Francis, W9ACU

I am not a contest operator, but I enjoy this type of event. For the next contest I hope to operate 40M and 80M also.

--Rudy K2MVM

Got my old BC-610 transmitter and SX-17 receiver in shape again so drop me your newsletter when the next "CX" is due.

--Chuck, W8AN

A copy of "The Classic Radio Newsletter" fell into my hands and I love it! How can I get on the mailing list? I don't have a lot of classic gear of my own, but I really love the old gear. I have a Ranger I, Collins 75A3, 75A4, KNS1, SC101, and a late S line, from soup to nuts. I'd give my eye teeth to get an old Hallicrafters S29 -- my first short-wave receiver. --John, W81PG

Masochist's delight: worked WA8PEE using the Harvey-Wells TBS-58D and the Atwater Kent receiver -- and he was using the newer Harvey-Wells T-99 and receiving with a (choke! gasp!) S-38B (although no tuning eye -- inside joke). With that combination of receiving equipment on both sides one really had to be dedicated to get the QSO through!

Almost got the B&W 6100 on the air. With little luck in replacing the rf choke (plate circuit: 2.5 mh, 500 ma), I unwound the old one and wound a new one on the same form, using #24 magnet wire (enameled). It is installed and working just fine -- but while tuning up initially it blew yet another filter capacitor (the fourth). I figured the first (original equipment) could have been ready to go; the second (junk box) was older and used, ditto; the third (new) could have been defective; but when it blew the fourth (also new) I started looking elsewhere. I found a bad (very high resistance) bleeder resistor which skewed the voltage drop across the blown capacitors... It seems that no two troubles are ever the same: each is a new experience! Anyway, with resistor and filter replaced I got the thing working last night, putting out about 60 watts on 90 meters. There are still some problems (like all the other bands), but at least it is functioning if only marginally. Maybe on next CX!

Oh -- W9ZEN, Johnny, gets the "WAS" award - the "Worked All Stephenses", that is: he worked Ben Stephens (K9KOM), me (NSAIT), and you (K8SJ) all in the same CX. A first, I believe -- anyone else manage to work all three of us brothers? We shall have to find an appropriate award, maybe from your vast store of surplus equipment.

Great time, as usual, and really nice to meet the CX family, even though we get together only twice a year (and sometimes at Dayton). Worked most of the usual gang, and was glad to hear some newcomers: even the guy who shall remain nameless who was trying out his new keyer for the first time! Great line-up of old rigs, about the best I have run across to date. We have come a long way from the original "NX" (Nostalgia Exchange), and I still think it is a great idea. Also great to finally log the "real" K8SJ and the mighty Lysco. Welcome back, Stu.

Al NSAIT

1985 Classic Radio Exchange

A fun and interesting radio event, 2100 UTC January 27 to 0400 UTC, January 28. Object is to restore, operate, and enjoy older equipment with like-minded hams. A Classic Radio is any equipment built since 1945 but at least ten years old: an advantage, but NOT REQUIREE in the Exchange. YOU CAN USE ANYTHING (except 3 KW!), although new gear is a distinct scoring disadvantage and rather boring. Exchange your name, RST, state/province/country, receiver and transmitter type (homebrew send P.A. tube, i.e. "6L6"), and other interesting conversation. The same station may be worked with different equipment combinations and on each band on each mode. CW call "CQ CX", phone call "CQ Exchange". NON-CONTESTANTS MAY BE WORKED FOR CREDIT. Suggested frequencies: CW up 60 KHz from low band edges; phone 3910, 7280, 14280, 21380, 28580, Novice/Tech 3720, 7120, 28120.

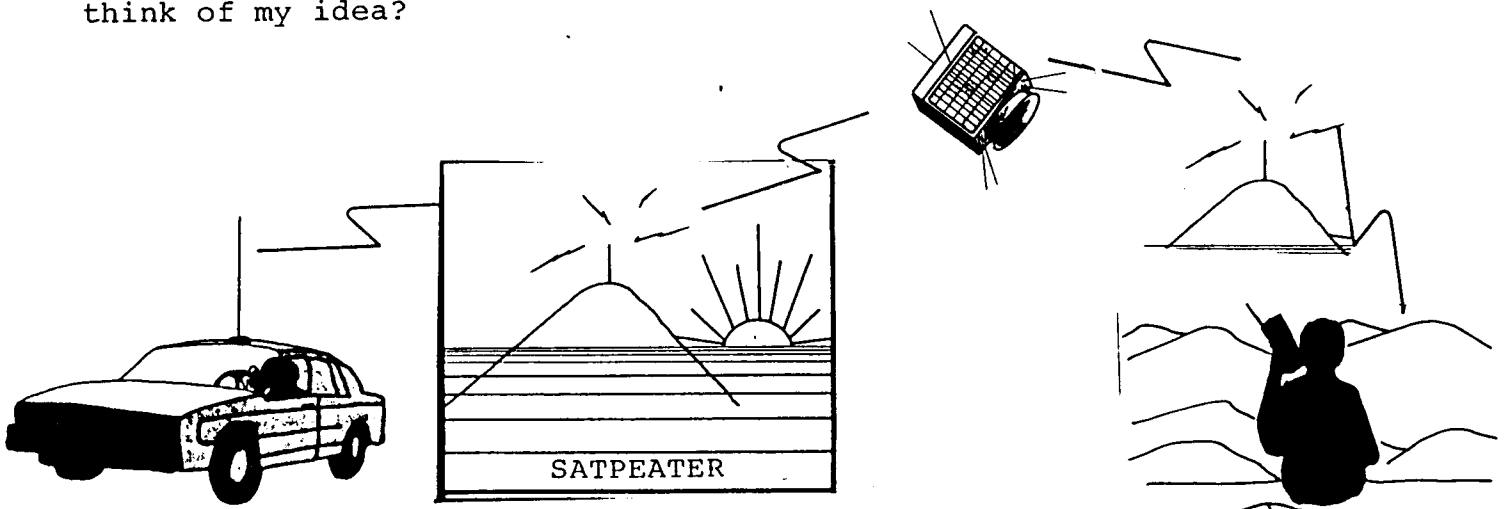

SCORING: Multiply total QSOs (all bands and all equipment combinations used) by number of different receivers, transmitters, states, provinces, and DX countries worked on each band and mode. Multiply that total by your Classic Multiplier: total years old of all receivers and transmitters used, three QSOs minimum per unit. If equipment is a transceiver, multiply age by two.

Send logs, comments, anecdotes, etc. to Stu Stephens, K8SJ, 1407 Hollywood Rd., Sandusky, OH 44870. Include S.A.S.E for Classic Radio Newsletter (printed in January and September).

MY TURN By K1BE

I'd like to propose a new system using the latest technologies made available to ham radio operators. I haven't thought of a name for it yet, so we are willing to take suggestions! The new packet radio systems being proposed suggests an idea to me: Put up satellites that use part-packet addressing systems, and voice. Low power hand-helds that have a microchip built in, automatically supply the unit designation with every transmission. These low-power, mobile rigs go into a special repeater. These repeaters use computer tracking methods to aim the signals at the nearest low-flying satellite, which would re-transmit the signals then, or wait until the station addressed is available. (Might be on the other side of the earth!) The mountain top repeater would have the role of taking the incoming FM or SSB signal, adding its' own identifier to the signal, locating the best satellite passing overhead, and transmitting the signal UP to that satellite. The satellite would have the job of receiving hundreds of these signals, deciding where they're to be sent, and then re-transmitting or storing them for future re-transmission. For example, say NLAGV is out in his car and wants to talk to WBLHIH in Pittsfield. His hand-held automatically inserts his ID (might be a string of numbers) at the start of the transmission. The nearby "SATPEATER" (just coined the word!), takes his signal, adds its ID, and if a bird is available, retransmits it straight at the satellite. (May not be available at that moment, in which case it would store for future transmission. Or it might have to wait for an "OK to send" message from the bird.) Note that NLAGV doesn't hear his signal being repeated. (Uplinked to the bird.) The satellite would get the SATPEATER's signal, and know where it was from. This is stored in its' memory. It would know that WBLHIH uses the SATPEATER K1FFK/r and would downlink to that machine. The K1FFK SATPEATER would send out a query signal to WBLHIH's rig, and if the radio accepted the call, would transmit the signal. Then a two-way would be possible between NLAGV and WBLHIH.

There is no reason why two very distant stations, say one in Germany and one in Africa could not QSO. The satellites could use the SATPEATER network to relay the signals down/up many times, or go directly between satellites with the signal. Digitally encoding the voice would make it error free, and not subject to doppler shifts, etc. There is no reason why we should be limited to packet radio in sophisticated linking systems! It would cost beaucoup bucks to pay for the system, but this type of technology would revolutionize ham radio. What do you think of my idea?

AUCTION REPORT

Our successful auction was held last month on November 2nd. A goodly number packed the hall, munching donuts, and slurping down the brewkis. Trivia and trash abounded, making the place look like a Mariner's convention with all the boat anchors! When all the dust settled, here's the profit picture: Coffee bar- \$41.05, Raffle- \$30.00, and from the auction sales and donations, - \$129.23! Over \$200.00!!!! Many thanks to all who made it a success, especially the few who donated items and put us over the top.

BOARD MEETING HIGHLIGHTS

- A few items from the Board of Director's meeting on November 5th.
- Field Day '85 will be held at the Western Mass Law Enforcement Academy. This is south of where the club meets in Feeding Hills. It's a great site, lots of room, and good radio propagation.
  - Alternate sites/styles for the June banquet are being explored. Going to a restaurant, hosting a smorg, snacks only, etc are being considered.
  - Awards for the January VHF SS will be given out by the club.
  - A Long Range Planning Committee chaired by WBLETS will explore where the club wants to be in the next five or ten years. Send your input into Ron or see him at the December meeting.
  - Sponsoring radio licensing and technical skills classes was discussed.
  - A bigger effort during the ARRL DX contest is being planned.
- Other items too lengthy to mention were covered.

VOLUNTEER EXAMINER PROGRAM

The club will sponsor its' first all-amateur-administered license session on Saturday, January 12th at 9 PM at the Hampden-Wilbraham Regional High School, 621 Main Street, Wilbraham, Mass. Examinations for all classes of ham license will be given, from Novice to Amateur Extra.

If you're interested in taking an exam, you should obtain an FCC form 610 from the ARRL or the FCC, and submit the completed form 610, with a \$4.00 check made payable to "ARRL/VEC". Mail this to:

YORKE PHILLIPS, K1BXE  
235 AMES ROAD  
HAMPDEN, MA 01036

Completed applications can be accepted until the cut-off date of December 14, 1984. Make sure you attach a photostat of your current license to the form 610!

**TIDBITS FROM PAST ZERO BEATS-1960**

WARC is very successful, with all present ham bands being kept...W1QFB (now W1YI) became the Area 4 CD radio officer...APX-6's being put to use by the members, thanks to the efforts of W1HDQ and W1QWJ...

**TIDBITS FROM PAST ZERO BEATS-1959**

W1CJK selling his Collins exciter model 301B...W1HDQ was guest speaker on the VHF bands...W1QWJ publishes yet another excellent article on antennas and feedlines for VHF...Pornographic material is being sent to club members because the advertisers are using ham address lists. Many complaints are being filed with the Postal Service...ARRL membership now costs the outrageous sum of five dollars!...W1HDM is the Field Day chairman with so many participating that we don't have room to list them. Some of the rigs being used at FD were: HQ-150, DX-40, BC-310, Collins 51J4, HT32, HT33A, Ranger NC183D and a Viking 2N6!...W1QQU, a former club president, became a silent key...W1TXS won the door price at a meeting, an Eico VOM kit...

**RG-8A<sup>U</sup> Coaxial Cable Sale**

A limited amount of this high-quality foam-core RG-8A coax is now on sale. Some local stores have been selling poor-grade cable for 37¢ per foot! Our coax is brand new, with 96% shielding. Here's your chance to save some money and get better performance.

Price: 500 foot roll, **25¢** per foot

100 foot lengths, **27¢** per foot

We'll bring your cable to the next HCRA meeting. You can order over the phone, but there is only a limited amount, and prepaid orders will be taken care of first.

Mail to: Jeffrey J. Duquette, K1BE

Dear CQ DX, What is the difference between Z (Zebra Time), GMT (Greenwich Mean Time), and UTC (Universal Coordinated Time)? Answer: They all mean the same. Take our local time (Eastern Standard Time) and add 5 hours to get Z, GMT, or UTC. Always use this time for QSLing DX stations.

SPECIAL AWARD PRESENTED TO FRANK POTTS, WALRWU!

At the January, 1984 meeting of the HCRA Board, it was voted that special recognition should be given to one of the club's members. He's been a stalwart supporter for many years, a leader in his field, and has inspired many of our members to pursue areas within the hobby they may not have considered otherwise. A plaque has been presented to Frank Potts, WALRWU, in recognition of his continuing contributions to amateur radio, especially in the field of UHF-VHF communications. His extraordinary efforts that produced record-breaking scores in the January VHF Sweepstakes, his technical help and inspiration for so many hams, and his newest efforts, and records set, on EME communications, enjoy our heartfelt support and a loud "Well done, Frank!".

TEN CARDINAL RULES FOR SELLING EQUIPMENT By Ed White, WLNPL

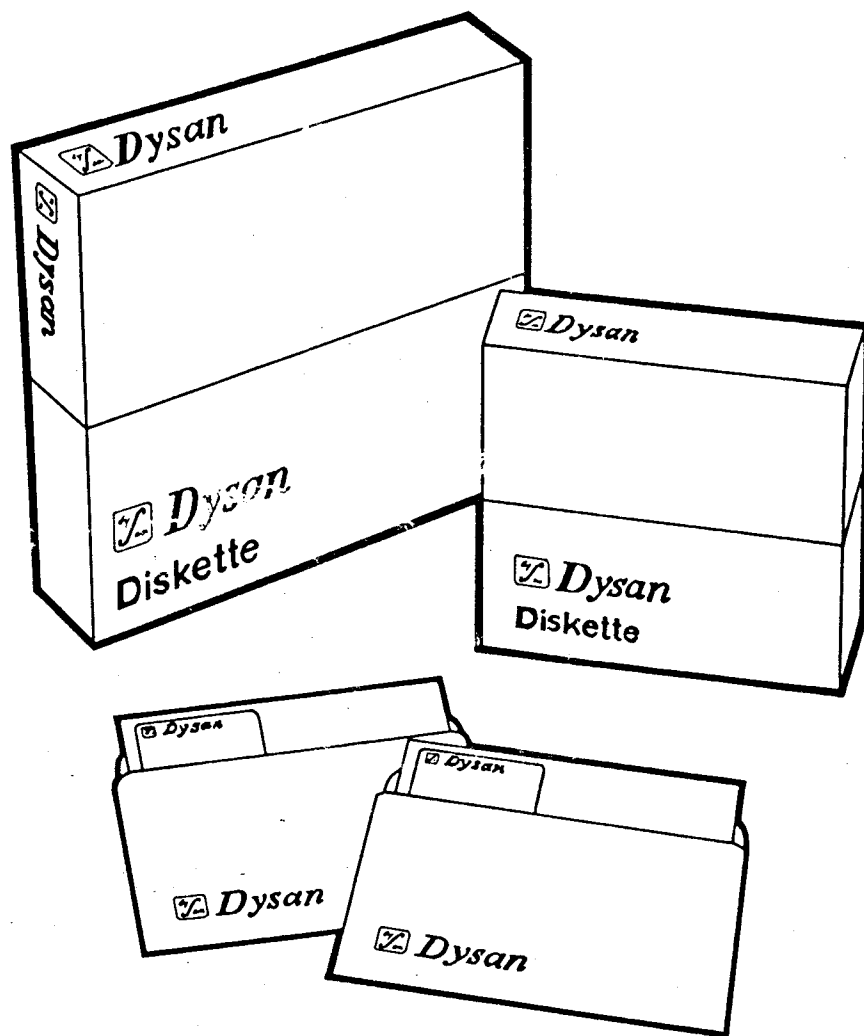

1. Clean up the gear, making it presentable.
2. Permit a demonstration, or a trial period.
3. When stating the selling price, be firm about the figure. (Be certain what you want!)
4. If you wish to bargain, don't set the price.
5. If you're willing to ship it, be certain to state who pays the shipping costs.
6. Sometimes a better all-around transaction can be had by accepting a trade.
7. Under no circumstances, accept "\$10.00 down, and .50¢ a week!". If the buyer needs cash let him get a loan from the bank!
8. Should the equipment be defective, state it, and make sure the buyer knows it.
9. Don't be misleading. i.e. It was only used by a grandmother to set her father's watch to WWV!
10. Remember that the vast majority of hams are anxious to please the buyer.

from THE OSCILLATOR, Feb, 1968, VARC Newsletter.

TIDBITS

WB1DLH passed amateur Extra class! FB, George, wish KALBNN was still alive to see it...WB1DBY visited League headquarters over the holiday...W1KK has a new 85 foot tower up...AC1T traveling all over the country for his company...K1KBN passed advanced, congrats, Ken. When will you pass the extra, at the January test session?...W1WKG looking to buy a computer...K1BE would like to borrow a 220 set-up for the January SS. Can anyone help?...Sign up for the January 12th VE session by December 14th. See the articles elsewhere in ZB. ...K1BXE has talked at the MTARA and NOBARC clubs about the VE program...W1RWU going to school nights, and working full-time days...W1HKN now able to copy ARRL bulletins from W1AW by using his new RTTY/ASCII set-up...W1FYS has left the post as a shipboard radio op', and is now at the ship-to-shore station at Tuckerton radio, WSC as the CW man. You can listen for his signals on 8680, 12879.5 and 16916.5 khz. Walt sends his best regards to all...W1SOF now certified as a scuba diver...

# Dysan. The Finest Quality Diskettes Available.

Dysan's 5¼" or 8" diskettes are available single- or double-sided, and in single- or double-density formats.

Dysan's advanced production techniques assure that each Dysan diskette is certified 100% error free. So you can count on Dysan for your IBM\*, Apple\*, Tandy\*, Atari\*, Commodore\*, Osborne\* or other personal computers.

So give us a call. Or stop by. We have a complete inventory of the finest quality diskettes on hand.

Tidbits

page 9

KAIKPH has put together a packet radio Digipeater that will serve the greater Springfield, MA area. It should be up and on the air by the time you read this! Listen for strange noises on 145.010 MHz ... and if you are further interested in packet radio, look to the February HCRA meeting where computers and packet radio will be the topic....speaking on packet radio, Yorke KIBXE is also up on packet with a TAPR TNC board....the HCRA project to get WINY (the club station) on the air for the January contest is well under way. WIKK, the trustee, is providing the QTH and lot\$ of support - we now have a 80+ foot tower for 4-2m boomers....Frank WAIRWU will be setting these up for 2m moonbounce operation, too! That should help with the multipliers....will we see you on in the January contest? Hope so!....Fred KAIAPR has also been doing a FB job with the 6m WINY station work....Is anyone going over to Rhode Island for the VHF contest???.....Ads in Zero Beat are free for members....Some members of the HCRA have been heard on TEN meters Thursday nights, 9PM local time around 28.650...stop by and check in sometime!....Shawn KAIMCA worked Mike KA3JUT in PA..Mike writes..."I found your QSL card in the mail and I am happy to receive it. I'll let you in on a secret. You were my first contact - not counting my Elmer. So for the occasion I am sending you a modest gift." Mike also writes "...I've had my ticket for two years now but had never had a chance to get on the air. I am 70 years old and a retired steel worker. I travel a lot sight seeing. Been in

every state at least 3 times." Shawn received a crisp \$10 bill and a pack of QSL cards ... a very kind gesture indeed! Can you top that one?!....Greetings to Chris KA3FIM new to the area...his low band equipment is up for sale; the tower was partially used at WINY/WIKK...he has left: TS830S, VFO, speaker, ant tuner, Ham IV, 24h clock, MC50 mike, A3, dipoles & coax ... interested? Call him at 739-5868 anytime....All members (and non-memebers, too!) take note: Ron WBIETS is the HCRA chair for the long range planning committee so you should get your ideas in to him where you think the club should be directing its efforts in the future....Boy, those call books are going FAST so if you are interested, Ron WBIETS is the guy to see...they are \$15.00 each; either US or DX - same price....We will have a VIC-20 computer to raffel off at the February 1<sup>st</sup> meeting....Have something you'd like mentioned in Zero Beat? We'd be glad to include it for you - anything is welcome, from tidbits to articles - please write or call - we appreciate hearing from you!...Thank you for your support of the auction!...The HCRA will have certificates and awards for those of you who participate in the January VHF contest! Certificates for ALL club entries and special awards - more next issue!...so get your VHF equipment fired up and tested and see you on the air!

CHRISTMAS GREETINGS de WINYK

To Art, (KK), of Agawam, greetings bestir  
Likewise to Phil, the fox hunter, Yes Sir!  
Skoal to Bert, (DTZ), and Steve, (EYF).  
Same to (WIDGJ), and (UWX), bearded Cliff.

Under the mistletoe, YL's, a hug and a kiss  
For without you our Christmas would be amiss.  
"Pipe" Howard, a patriarch and brown bagger for sure,  
To Larry, (DBY), a present, a chocolate cake cure.

The leaping activity that balloons and surges,  
On field day from the woodwork always emerges.  
This is to say greetings to the silent majority  
Like (MAL), (GXU), and (BXB).

To Larry (CJH), a man of great zest  
May he host a future league hamfest.  
(ACIT), John, season's greetings from OSCAR  
Also to (CJK), and Fred Stefanik, (APR).

A cheery holiday to George Hughes, Bob Roy, and Jackowski  
That's Al, (SMH), also to Dave Isham and Rudy Zerdecki.  
A crackling hearth, festive, cozy and warm  
For George Nelson, Ray, (GLX), Gent Lam and Ed Strom.

A toasty sun Florida Eunice, There's no better guess  
Also to Tom, (KUE), Bob, (KUL), and Mr & Mrs Paul Kress.  
Hoist the grog, (BE), whether bitter-sweet or tart  
And shout peace to Al Rich, Bob Phoenix and Jim Markwart.

Phil (GXY), both busy and aghast  
At his hamshack, MARS running full blast.  
(PKZ), nice voice on the air, sure to endure  
Greetings to Sandy, also Leo Brodeur.

(RED), Don's signal, always five by nine  
Plus a wad of QSL's also on time. (?)  
Vince (GVV), rushing 'tween schooling and desk  
To log new data to keep things abreast.

Norm (AFY), look up 'tis Santa way above  
Wishing best to you and season's of love.  
Also to Roland (GYT), Don (UPH), and Bill Lowe.  
Lest not forget, (UIV), and (EMB), good ol' Joe.

Golfer Bob (ABJ) -a 67! -not telling a soul  
Returning next day to shoot the second hole.  
John and Barbara secretly vacationing in Maine  
Yule gifts to you both and to Ed Fontaine.

To (FJ), of Northamp, Jean (IJV) and Norm  
Yule tide cheer, ditto to (FIP) and (ETS), Ron.  
Smooth seas to (AEH), with fresh nor'west weather  
Same to Captain (JP), and his first mate, Heather.

To the KA ones', (DNX), (ECJ) and Larry Savoy  
Also, (KM), (KRJ), happy holidays with peace and joy.  
Under the tree, a new rig no less than ICOM  
For (ZEV), (BWD), and (YYW), Dick Melbourne.

Did Santa forget a call? perhaps, for shame  
Greetings nevertheless to Mr and Mrs Murname.  
Also to (VAH), (BZH), and (SOF), Pete  
Not leaving out UHF'er (FVS) and Ed Overstreet.

Who would have thought, even hazzard a guess  
Bob Stevens, (KAIV), (NYF), (ROC), all Holyoke, no less  
And Pat Foley, Don Farley, and all fellow members  
Best holiday wishes for all days in Decemoers.

Our snow covered beam, glistening in the sun.  
Brings life to the bands, (RLV), (TXS) join in the fun.  
Use cw (that's Morse), be both sagacious and wise  
Snare a Christmas Island contact before its demise.

To wish tidings to (POB), Dave and Bill Lucardi  
Same to (PLS), (WTK), all members of coterie.  
Joy to you all, including (NOG) and Al Drake  
Add cheer with egg nog and a Christmas fruit cake.

Who has slim hips, broad shoulders, cowboy image and svelte  
If it wasn't for the sagging droop over the belt  
To all fellow hams, with girth of dimention  
Your Christmas gift? Sadly, "TOTAL ABSTENTION".

To our favorite Bruce Felper we always did clew  
Also (QMV), (CQL), (CRX) may DX ensue.  
Ken Grady and (HUS), season's carols and sings  
Also to (ERS), and (JDY) who builds things.

Avoid season pileups, like a sea of piranahs  
To our club officers, many THANKS and HOSANNAS.  
Without your leadership the club wouldn't survive  
For three score, plus one and a five.

When the grim reaper nails the lid with a bang  
And you hear a faint CQ, to a great radio gang,  
Listen closely, it'll just be a whisper, not a yell  
It'll be me, you wait and see, Ed, W I N Y K.
