## CAPTAIN LEONARD HOUSE

During the last month's meeting a popular vote was taken and by a show of hands we voted to return to the Captain Leonard House in Agawam as our regular meeting place. This was decided with the reservation that meetings of a special nature at which we might have a very large crowd would be scheduled elsewhere.

NOVEMBER The November meeting will be held at the Captain Leonard MEETING House on November 7th starting at 8 P.M. The main speaker of the meeting will be Byron Goodman, WIDX, Technical Editor of QST. He has agreed to talk to us about his new receiver soon to appear in QST and may have the completed receiver there. He will also show 35mm slides showing the receiver in various stages of construction. Of course refreshments will be served after the meeting and the usual free door prize will be offered.

OCTOBER Last month's meeting was held on Friday, October 3rd, at the MEETING old United Church in Wilbraham. The meeting was attended by over 50 members. The feature of the meeting was a talk by Dick Stevens, WlQWJ, about the renovating of older receivers. Dick also demonstrated a teleprinter hooked up to his modified BC342 thru his recently completed converter from QST. A lively question period followed the talk. A vote of the members present was taken to indicate preference of meeting places. The treasurer was kept busy accepting dues for the coming year. The free door prize, a Callbook, was won by Eunice, WlUKR. After the meeting proper, we had the usual coffee and donuts, and one of our enterprising members displayed some new Hallicrafters gear in conjunction with the Hallicrafters SSB and VHF contest month.

GET OUT For the many of us eligible to vote this time of year it is important and it behooves us to get out on election day and VOTE at least cast our ballot for the candidate of our choice in national, state, county and local elections. Whether we actively campaign or not we should feel it our duty to help select the "man for the Job". Also, and not so widely heralded, the month of November is election month for officers of the league. You have all by now received your ballots through the mail from the League. The ballot is one way we all have of helping direct the activities of the League. If you feel that a change of leadership is in order, VOTE---if you would say "Well done" then VOTE. Get your ballot to the League before November 20th. But why wait????? DO IT NOW.

THEY SAID

A couple of years ago Zero Beat ran an article on a new gain-type transmission developed by one of our members. BE DONE

This seemed at the time to be the ultimate in antenna efficiency, but one of this paper's reporters has discovered that Al Jackson has DONE IT AGAIN! This year he has unveiled a new concept in antenna design using series-in-phase yagis closely coupled back-to-back. Simplified sketch:

TRANS

TRANS

TRANS

TRANS

Each bay of the antenna has a forward gain of 9 db for a total of plus 54db. Losses in the co-ax coupling equal 3 db. Giving a forward gain net of 51 db, or an effective power gain of 17. This promises to eliminate \$1-\$8. Al let it leak to our reporter that he intends to finish his experiments soon on his new receiving antenna set-up to eliminate \$9-20 over 9. He hopes to attain a feed-back circuit from antenna #5 to antenna #1 and thereby set up a super-regenerative antenna system. More about this in our annual April issue.

ALL DUES The fiscal year for the club starts on November 1st of every ARE DUE year, and on that date the membership dues are payable. The treasurer will be on duty at the next few meetings taking your money and disbursing membership cards. For the benefit of the newer members, no application is necessary if you were a member before. For full time students who have been members for one or more years, the special student fee of \$1.50 is applicable. For the rest of us the time honored, anti-inflation, \$3.00 is the thing. Let's get the dues payed early this year and show our co-operation—and not get dropped from the Zero Beat mailing list.

CALL LETTER Arrangements have been made to purchase at a quantity price LAPEL PINS some very attractive call letter lapel pins. Chet Balicki WIVK will be taking orders at the meeting for the last time. See Chet for all details.

CLUB: The practice of wearing large club badges is not a new one to BADGES the ham fraternity. It is an informal way of introducing ourselves to the other hams at club meetings, auctions, conventions etc. Just as the call letter lapel button has started many a conversation between hams, the club badge hives us a chance to recognize those we have worked on the air. Get your LARGE club badge at the next meeting. The cost of the badge is 35¢ to cover its cost to the club. See the treasurer—you will anyway to pay your dues.

NO NEWS--- Some of the papers that your editor receives in exIS NEWS??? change from other clubs are full of local gossip and
Views gleaned from "reading the mail" of club members.
(Some of the papers have only that.) For some time Zero Beat has been almost devoid of such tidbits and not entirely due to editorial policy.
(Nobody sends me the stuff.) There, I said it and I am glad. If someone will send me the material I will put it in the paper. If you don't care for it in the paper, just don't send it.

DO YOU BELONG Most of the club, fortunately, does. This enables our TO THE ARRL? club to continue its affiliation with the league and to take advantage of the special privilege offered to affiliated clubs. We all pay our dues (\$4.00 per year) to the league and in return get the benefits accruing members, and the monthly QST. If when you get your notice of renewal card from the League, you pay your League dues to the club treasurer, the club will benefit. The club is allowed to keep 50¢ of your dues for the club treasury, which amounts to a tidy sum with over 100 members in the club. So watch for that card and get it to the treasurer at the next meeting. You save yourself the check and mailing costs, too.

from a filled and a fill a fil

OLD FASHIONED The hams of Stafford, Conn. have banded together inget TOGETHER formally and are going to hold an old-fashioned "ham" get-together. The affair will be held on the 9th of November (a Sunday) at the Stafford Fair Grounds in Stafford Springs, Conn. All hams, their families, and their friends are invited to attend and there is no admission charge. Starting time will be 10.30 AM and the festivities will last all day RAIN OR SHINE. Bring your own lunch or get hot-dogs, hamburgs, coffee, etc. there. Among the planned features are a gear auction, swap corner, and mobile transmitter hunts on 10, 6 and 2 meters. This get-together is sponsored by all Stafford hams. They are not an organized club and say that because they have little or no money there will probably be no prizes. However, everyone should have a good time -- and there is no admission!

FOR DX-100 in excellent condition mechanically, electrically, and SALE physically. \$180. WINPL Chicopee Falls

For Sale or swap -- A Meisner 150B---250 watts phone or cw--VFO on 160-20 meters. Will sell outright or swap for a Viking 2 or DX-100. Call Howard, WIIOL, at LY 6-4286.

For Sale - Factory wired Johnson Ranger in excellent condition. Sale price \$200. Call WIHYO at RE 3-1543.

NOVICE Crystals -- Bring those old and now unused Novice band frequency crystals to the meeting. Several Novices have contacted your editor with an appeal to advertise for crystals -- some of them so they can finally get on the air:

RADIO TALK TO On Sunday evening November 2nd, a talk on ham radio CHURCH GROUP was presented to the Young Peoples Group of South Congregational Church. Participants were Bob Gordon, WIKUL, Tom Barrett, WIKUE and Eunice Gordon, WIUKR, with an assist in demonstration of a 2 meter communicator by Fred Boyce, KICZZ in a mobile and Bill Rosner, WIRFU from the home location.

PUZZLER'S Among the first answers received to last month's problems corner those from WICLW, KIGJU, and WIMOK. It is interesting to note that among these and all others received, no one person had correct answers to both problems, although many sent in solutions to only one. Here are the answers to last month's problems.

- 1. The man took the goose across on the first trip. On the second he took across the fox and returned with the goose. Then he took across the grain, and the goose again in turn. (Alternately he might have substituted the grain for the fox on his second and third trips.)
- #2. This puzzle seemed to give the most trouble. The side view of the figure would have looked like this to you if you could have mentally travelled around to the side.

When asked to identify the character in a picture on the wall, the poet said: Brothers and sisters, I have none -- but that man's father is my father's son. Who is the character? as impaid no you was gon't speed brolled? 1.14

Illy eneds yeard on no sittle aved year

- 2. A conductor, a brakeman and a porter are on a train. Their names are Tom, Dick and Harry, but not necessarily in that order. Also on the train are three passengers bearing the names of Tom, Dick and Harry. In order to distinguish them from the trainmen we shall place a "Mr." in front of their names. Now carefully consider these relevant facts:
  - Mr. Tom lives in New York City. a.
  - The brakeman lives halfway between N.Y.C. and Chicago. b.
- c. Mr. Harry earns exactly 4700 per year.
  - d. Dick beat the porter in a pool game.
- The brakeman's nearest neighbor, who is one of the passene. gers, earns exa ctly three times as much as the brakeman. Trend frequencies

cobile and Bill scener, Wisty Cross one home locavion.

f. The passenger living in Chicago has the same name as the brakeman.

What is the name of the conductor ??
